

au-Lika FOCUS

Description

Aulika is the new line of coffee machines for the OCS and HORECA markets, fully expressing the excellent quality of Saeco technology.

Aulika Focus is the perfect balance between dimensions and performances: all the best of the professional appliances (double circuit, conical grinder, professional homologation) in an elegant and relatively compact shape.

The wide graphic display, designed to manage both icons and text in different languages, and the interface (equipped with large, easy to understand direct selection buttons) make it possible to use and program the machine easily; maintenance and cleaning operations, too, are made easy by the fact that all the parts that require regular care are removable.

Aulika Focus can dispense coffee and milk-based drinks, as well as hot water and steam for more expert users; it is also equipped with "ONE TOUCH" function, and automatically provide cappuccino and latte macchiato, thanks to a special next generation cappuccinatore, integrated in the nose of the machine. The quality of milk foam and the temperature in the cup, two fundamental characteristics of a good milk-based product, are really top of the line. The cup warmer

and the powder option (for the use of pre-ground coffee) are the completion of a full coffee experience.

Aulika is the Saeco range addressed at the most demanding out of home professionals.

Main features

- Double circuit, with double pump and double boiler
- User interface with graphic display and 8 direct selection buttons
- Wide programming menu in the local language
- New "Pinless wonder" cappuccinatore and "ONE TOUCH" function for milk-based specialties
- Pre-ground coffee option
- Professional certification pursuant to the 60335-2-75 standard

Aulika Focus

Technical data

Structural characteristics

Dimensions	334 x 380 x 452
Weight	15
Frame	metal
Chassis	silver metal sides and back (structural), silver ABS front, double painted, with stainless steel interface frame and grid
Colour	full silver
Power supply	230/50 Hz
Absorbed power	1400 W
Water supply	independent tank
Water supply connection	no
Hydraulic system	2 circuits, (double pump + double boiler)
Boiler material	stainless steel
Coffee bean container	1, capacity 350 gr
Water tank	1, removable, capacity 2,2 l
Coffee grounds capacity	18
Coffee grinder	with conical steel blades
Coffee brewing unit	removable and washable
Coffee strength adjustment	manual, from 6 to 10 g in 6 steps
Grinder setting	manual, 8 levels
Electronic pre-infusion	yes
Coffee dispenser height adjustment	yes (85-105 mm)
Simultaneous dispensing of 2 coffee cups	yes
Possibility of using milk coffee glasses (14 cm)	yes, with dispenser in rear position
